

What is claimed is:

1. A sealing agent for Liquid Crystal dropping method
for LCD panels which comprises a photostetting component, a
thermosetting component and a photostetting agent,
5 characterized in that the reduction in the logarithm of the
specific resistance of liquid crystals as determined by
Measurement Method A described in the Detailed Description
of the Invention is 8 % or less, and the change in the
phase transition temperature of the liquid crystals as
10 determined by Measurement Method B in the Detailed
Description of the Invention is 0.5°C or less.

2. The sealing agent according to Claim 1,
characterized in that the reductions in weight at room
temperature and at 150°C as determined by Measurement
15 Method C described in the Detailed Description of the
Invention are 0.05 weight % or less and 0.5 weight % or
less, respectively.

~~3. A LCD panel manufactured by using the sealing agent
according to Claim 1 or 2.~~
